EA 916
Journalist unit

PRODUCT INFORMATION

The EA916 is a "stand-alone" USB audio interface with built-in telephone hybrid and monitoring for a journalist to record a telephone conversation in a fast and easy way. A standard Windows or Apple Mac computer will recognize the unit and install a driver automatically. Balanced analog line inputs and outputs on XLR and SPDIF I/O on RCA cinch makes it a very flexible unit.

The built-in telephone hybrid can connect to POTS analog telephone system or the unit can be used with a mobile (GSM) telephone. The mobile telephone connector on the front panel is compatible with the cables already available for the S25 Reportophone.

The unit has a balanced 48 Volt phantom powered microphone input connector with gain control on the front. The headphone jack connector and volume control are also available.

EA916 back panel . :

USB connector for the audio module,
"Loop" USB connector for easy connection of other USB devices on front,
Aux connector for monitor loudspeakers,
D9 remote connector.

Mains power supply: wide range system 85 .. 260 Volts AC, 47 .. 440 Hz.

Please contact your local EA dealer for more information about Eela Audio products.
